2-Phase operation

There are 2 phases of work of the 220 system. The 220 (220) has a unique timing of strokes and the stroke speed is 1.30 m / sec. The 220 (220) is a unique timing of strokes and the stroke speed is 1.30 m / sec. The 220 (220) is a unique timing of strokes and the stroke speed is 1.30 m / sec. The 220 (220) is a unique timing of strokes and the stroke speed is 1.30 m / sec.

Maximum security and safety

The 220 (220) has a unique timing of strokes and the stroke speed is 1.30 m / sec. The 220 (220) is a unique timing of strokes and the stroke speed is 1.30 m / sec. The 220 (220) is a unique timing of strokes and the stroke speed is 1.30 m / sec.

Low maintenance and high efficiency

The 220 (220) has a unique timing of strokes and the stroke speed is 1.30 m / sec. The 220 (220) is a unique timing of strokes and the stroke speed is 1.30 m / sec. The 220 (220) is a unique timing of strokes and the stroke speed is 1.30 m / sec.

Thanks to its advanced range of high quality products, 220 (220) is a unique timing of strokes and the stroke speed is 1.30 m / sec. The 220 (220) is a unique timing of strokes and the stroke speed is 1.30 m / sec.

With 220 (220) you can see the 220 (220) after the last operation of the highest quality gate opening system. The 220 (220) is a unique timing of strokes and the stroke speed is 1.30 m / sec.
